

Moin Ud Din Shah

Junior Full-Stack Developer

moheenshahtrimzi@gmail.com | +92 343 9597052 | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

SUMMARY

Junior Full-Stack Developer with a Computer Science degree and hands-on experience building production-ready web applications using React, Node.js, Express, and relational databases. Strong backend focus with experience in REST APIs, role-based access control (RBAC), database design, and system architecture. Proven ability to deliver real-world projects for clients and translate requirements into scalable solutions.

TECHNICAL SKILLS

Frontend: React.js, Vite, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, NestJS, REST APIs, Authentication, RBAC

Databases: MySQL, PostgreSQL, MongoDB, SQL, Relational Database Design, ER Modeling

Tools & Practices: Git, GitHub, MVC Architecture, CRUD Operations, Auth0, Socket.io, AWS S3

Other: Basic ML & NLP concepts, API testing, QA workflows

WORK EXPERIENCE

Full-Stack Developer | [Orixity](#) | Remote | Feb 2024– March 2025

- Developed 10+ client websites including portfolios, business websites, and small web applications.
- Delivered responsive UIs and backend integrations based on client requirements.
- Worked independently with clients to gather requirements, implement features, and deploy solutions.

Visual Content Annotator & AI Data Quality Evaluator | [CrowdGen by Appen](#) | Remote | Mar 2024 – Present

- Started as a Data Evaluation Specialist and promoted to QA role based on performance.
- Reviewed and validated large-scale datasets to ensure accuracy, consistency, and guideline compliance.
- Performed quality checks and provided feedback to maintain high data standards.

AI Model Trainer | [Appen](#) | Remote | Oct 2024 – Jan 2025

- Trained multilingual AI models by generating structured prompts and evaluating model responses.
- Assessed accuracy, contextual relevance, and linguistic quality across multiple datasets.
- Followed strict evaluation criteria and contributed to benchmark datasets.

EDUCATION

Bachelor of Science in Computer Science

COMSATS University Islamabad, Abbottabad Campus | Mar 2021 – Mar 2025

Relevant Coursework:

- Full-Stack Web Development (React, Node.js, MongoDB, Express)
- Database Management Systems
- Artificial Intelligence & Machine Learning
- Mobile App Development (Flutter)

PROJECTS

Lemara Commercial

Full-Stack Web Application | Real Estate Platform

- Engineered a web solution for a real estate firm using NestJS and React.
- Enabled property listings, client inquiries, and role-based dashboards.

- Built a property listing management system, client inquiry processing, and secure backend with responsive frontend.

Tech Stack: React, PostgreSQL, AWS S3, Maps API

S4 – Security Recruitment App

Full-Stack Web Application | Recruitment Platform

- Recruitment app for security jobs with company job posts, applicant tracking, and interview scheduling.
- Features company job posting system, applicant tracking and management, interview scheduling and feedback, and security clearance verification.

Tech Stack: ReactJS, Node.js, MySQL, Auth0

4 Rays – Casino Management Tool

Full-Stack Web Application | Analytics Dashboard

- Casino management tool developed in React and NestJS featuring real-time analytics, user management, and transaction tracking.
- Includes real-time analytics dashboard, user account management system, transaction tracking and reporting, and data visualization and insights.

Tech Stack: React, NestJS, MongoDB, Socket.io

Biodiversity Consult (UK)

Full-Stack Web Application | Environmental Platform

- Developed a platform supporting UK environmental initiatives.
- Includes tools for tracking biodiversity metrics, calculating ecological value, and managing conservation projects.

Cloudswish Software House Website (UK)

Corporate Website | UK Software House

- Created a corporate website for Cloudswish (UK), highlighting their services, client portfolio, and testimonials.
- Delivered a modern, responsive UI aligned with the client's brand identity.

Keystone Care – Healthcare Management System (Final Year Project)

Full-Stack Developer | UK-based Client

- Designed and developed a full-stack healthcare management system to digitize home-care operations.
- Built a public website and four role-based dashboards (Admin, Resident, Doctor, Staff).
- Implemented RESTful APIs, authentication, and role-based access control (RBAC).
- Designed a normalized relational database using ER modeling to manage residents, staff, doctors, medical records, activity plans, dietary plans, attendance, and feedback.
- Focused on backend architecture to ensure data integrity, scalability, and secure access.

Tech Stack: React.js, Vite, Tailwind CSS, Node.js, Express.js, MySQL, REST APIs, SQL, RBAC, MVC
